

\$12

- Had to chase missing clinical documentation after submission
- Resubmit requests due to incomplete intake
- Go back and forth with providers for basic details

- Verify all required patient, provider, and insurance information
- Ensure CPT/ICD and clinical documentation are aligned
- Identify payer-specific requirements before submission
- Reduce delays, rework, and unnecessary follow-ups

- 1-page Prior Authorization Intake Checklist (PDF)
- Structured sections for:
- Patient & insurance verification
- Procedure & diagnosis validation
- Clinical documentation review
- Payer-specific requirements
- Final pre-submission check

- A daily intake guide
- A training tool for new staff
- A quality check before submission

- Prior Authorization Specialists
- Intake Coordinators
- Medical Assistants handling authorizations
- Teams looking to improve consistency and reduce delays

Most teams don't realize how much time is lost fixing incomplete submissions until it becomes a daily issue.

If you're tired of chasing missing information after submission, this checklist gives you a simple way to get it right upfront.

Bottom line:

If you're tired of chasing missing information after submission, this checklist gives you a simple way to get it right the first time.

Simple to use. Easy to implement. Built for real workflows.

 How this fits into the full workflow:

- Start with the **Intake Checklist** → prevent issues before submission
- Use the **Delay Guide** → understand where breakdowns happen
- Upgrade to the **Survival Kit** → full workflow, templates, and systemView all tools:
