FOLLOW-UP TIMING GUIDE

Day	First follow-up
Day 1	First follow-up
Day 7	Second follow-up
Day 10	Third follow-up

REQUESTS BY STATUS

Pending (33%)

Approved (33%)

Denied (0%)

No Auth Needed (33%)

4

FOLLOW-UP WORKFLOW
Built-in schedule keeps your team on track.

DAY 3

Check Status

Review portal or payer system

DAY 7

Follow-Up Call

Contact payer or visit portal follow-up

DAY 10

Escalate

Request supervisor review / escalate

Benefits

- Stay ahead of delays
- Reduce aging requests
- Improve follow-through
- Prevent denials
- Save time & rework

5

WHAT THIS SOLVES
From overwhelmed to in control.

BEFORE

- Sticky notes & emails
- Multiple spreadsheets
- Missed follow-ups
- No visibility
- Delays & denials
- Rework & frustration

AFTER

- One centralized tracker
- Clear ownership
- Follow-up reminders
- Full visibility
- Faster approvals
- Better outcomes

6

WHAT'S INCLUDED
Everything you need to stay organized.

- Automated Prior Authorization Tracker (Excel)
- Dashboard Overview
- Follow-Up Workflow Guide
- Risk Flag Reference
- Status Definitions
- PDF Instructions & Setup Guide

Microsoft Excel

Google Sheets Compatible

Save Time

Reduce Delays

Improve Visibility

Better Outcomes

Built for Prior Authorization Teams

Prior Authorization Status Tracker & Follow-Up System (Automated)

\$39

Stay in control of prior authorizations after submission.

Most breakdowns don't just happen at intake.

They happen after submission — when requests get lost, sit too long, or require constant follow-up.

This system fixes that.

What this helps you do

Track every authorization in one place

Know exactly when to follow up

Identify delays before they become problems

Reduce missed requests and unnecessary rework

What's included

- ✓ Fully structured authorization tracker (Excel)
- ✓ Automated "Days Pending" calculation
- ✓ Suggested follow-up timing
- ✓ Built-in risk flags for delays and missing updates
- ✓ Dropdowns for status, priority, and follow-up method
- ✓ Conditional formatting to highlight problem cases
- ✓ Dashboard view for quick visibility

Use this to:

- Keep track of all active authorizations
- Standardize follow-up across your team
- Prevent requests from slipping through the cracks
- Improve visibility across your workflow

If you're seeing:

Requests sitting with no updates

Follow-ups happening too late (or not at all)

Teams unsure of what needs attention first

👉 This is where the breakdown is happening.

Part of a complete workflow system

This tool focuses on post-submission tracking and follow-up.

If you need:

- Intake structure → Intake Call Script
- Submission accuracy → Intake Checklist
- Root cause analysis → Audit Tool
- Full workflow system → Survival Kit
