5

BEFORE VS AFTER

BEFORE THE SURVIVAL KIT

- Difficult processes everywhere
- Missing information & rework
- Missed follow-ups
- New staff take longer to learn
- More denials & appeals
- Frustrated staff & providers

More delays. More rework. More denials. More stress.

AFTER THE SURVIVAL KIT

- Standardized workflow
- Complete & accurate submissions
- Consistent follow-up
- Faster onboarding
- Fewer denials & appeals
- Better outcomes for patients

Less rework. Less stress. Better results. Happier team.

A BETTER PROCESS LEADS TO BETTER RESULTS.

6

TRAINER BUILT. REAL WORLD PROVEN.

Reduce Denials

Improve accuracy and submission quality.

Improve Efficiency

Standardize and streamline your entire process.

Train Faster

Get new staff productive in less time.

Better Outcomes

Happier patients. Better results.

INSTANT DOWNLOAD. START USING TODAY!

Prior Authorization Survival Kit

\$79

One-time purchase — no subscription — use for your entire team.

Stop chasing prior authorizations and constantly following up.

This system helps you stay organized, reduce delays, and handle every authorization with a clear workflow from start to finish.

If you're dealing with:

- Constant follow-ups with payers and pharmacies
- Missing information slowing down approvals
- Denials that could have been prevented
- Trying to track multiple PAs with no clear system if you've ever had to call back multiple times, resubmit the same information, or track cases across different systems — this was built for you.

This was built to fix that.

- ✓ Catch missing info BEFORE submission
- ✓ Reduce repeated calls and follow-ups
- ✓ Stay organized across multiple authorizations
- ✓ Fix denials faster with clear next steps

What's Included (with Benefits):

- ✓ **Prior Authorization Master Workflow** — Step-by-step roadmap
- ✓ **Google Sheet Tracker** — See every PA status in one place so nothing falls through the cracks
- ✓ **Call & Fax Scripts** — Word-for-word templates to reduce errors
- ✓ **Denial & Appeal Templates** — Resubmit right and faster
- ✓ **Quick-Start Guide** — Implement today with confidence

This isn't about doing more work — it's about preventing the same work from happening twice.

Why This Works

Built from hands-on experience managing prior authorizations across provider and payer workflows — including high-volume intake, submissions, denials, and follow-ups

Why This System Is Priced at \$79

This isn't just a set of PDFs — it's a complete workflow system built from real prior authorization experience.

It's designed to reduce rework, prevent avoidable denials, and give you a clear structure from intake to approval.

Most clinics build systems like this internally or pay consultants thousands to create them.

This gives you the same structure — ready to use immediately — for a fraction of that cost.

Who this is for:

- Medical assistants handling prior authorizations
- Pharmacy teams dealing with insurance issues
- Intake coordinators managing high volume
- Anyone tired of chasing down missing information and follow-ups

Most teams don't realize how much time is lost to rework until they have a system in place. This is designed to fix that immediately.

Frequently Asked Questions:

Q: Do I need software?

[Add to cart](#)

- ✓ Complete Prior Authorization Workflow System
- ✓ Track, manage, and organize every case in one place
- ✓ Reduce delays, denials, and repeated follow-ups
- ✓ Templates and scripts to improve accuracy and consistency
- ✓ Built from real-world PA workflows — not theory
- ✓ All files are downloadable, easy to use, and ready to implement immediately

No refunds allowed

A: No — all tools are printable or usable with Google Sheets.

Q: Is this HIPAA-compliant?

A: Yes — the templates are designed for clinical workflows; always follow payer rules.

Q: Can I use this for my whole team?

A: Yes — share and customize for your office.

 **How this fits into the full workflow:**

- Start with the **Intake Checklist** → prevent issues before submission
- Use the **Delay Guide** → understand where breakdowns happen
- Upgrade to the **Survival Kit** → full workflow, templates, and systemView all tools:
